

## ABSTRACT OF THE DISCLOSURE

In a region where heat deformation of a movable scroll spiral wall and/or a fixed scroll spiral wall for a scroll type compressor is relatively large, a relieving  
5 part is formed for relieving the heat deformation of the movable scroll spiral wall and/or the fixed scroll spiral wall in at least a part of at least one of an outer circumferential wall of the movable scroll spiral wall and an inner circumferential wall of the fixed scroll spiral wall, which corresponds to the outer circumferential wall of the movable scroll spiral wall.
